**Simon Nicolussi**, SGCM-SSCM, Switzerland

**Joseph Tam**, Hebrew University, Israel

**Claude Vaney**, Switzerland

## ❖ Invitation to the IMCCB-25:

Dear colleagues from academia, clinics, and industry,

We are delighted to invite you to participate in the upcoming International Medical Cannabis Conference Bern (IMCCB-25), scheduled for February 13-14, 2025, at the University of Bern in Switzerland. Building on the success of previous Swiss cannabis conferences, IMCCB-25 aspires to bring together a diverse assembly of leading researchers, clinicians, industry professionals, and other experts and opinion leaders from around the world. The conference will cover a broad spectrum of topics, including basic and clinical methodologies, safety, analytics, pharmaceuticals, regulatory and legal considerations, pharmacological insights, and technological advancements.

Our emphasis is on practical implications for patients, researchers, medical persons, and industry leaders alike. Additional topics include palliative care, women medicine, pediatric, psychiatric and geriatric diseases, niche indications, as well as non-medical cannabis use. The IMCCB-25 seeks to inform participants about the latest evidence and concepts regarding cannabis- and cannabinoid-based therapies. It aims to assist prescribers in practically implementing best practices based on current research, expert opinions and therapy guidelines. Furthermore, the conference provides a unique platform for the exchange of ideas and practices in medical cannabis among professionals and patients, fostering innovative and engaging discussions.

By attending IMCCB-25, you will become part of fascinating and lively debates that contribute to the collective knowledge in this expanding and challenging field. We eagerly look forward to welcoming you to the vibrant and wonderful city of Bern for this enriching and collaborative experience.

Sincerely,

Jürg Gertsch & Rudolf Brenneisen

Conference chairs

## ❖ Scientific program:

➤ **9 Sessions, 35 lectures, 6 panels – ask the experts**

➤ **Topics:**

- **From Plant to Bench to Patient**
- **The complex pharmacology of cannabis**
- **Progress and challenges in evidence-based cannabis medicines**
- **Personalized cannabis medicines**
- **Pharmaceuticals**
- **Phytochemistry, Analytics, Bioanalytics**
