Sciences

Wednesday 21 August 2024
Von Roll Campus University of Bern

**«Challenges and Opportunities in
Pharmaceutical Sciences»**

Intention

The SWISS PHARMA SCIENCE DAY (SPhSD) is an annual event of the Swiss Academy of Pharmaceutical Sciences (SAPhS, www.saphw.ch). It offers a unique platform for scientists in the field of pharmaceutical sciences to meet, interact and learn.

The 17th SPhSD is placed under the theme of “Challenges and Opportunities in Pharmaceutical Sciences”. Four distinguished invited speakers will address this theme from the perspective of their respective disciplines. As in previous years, MSc and PhD students, as well as Post-Docs of the Swiss Academic Institutions for Pharmaceutical Sciences will have the opportunity to present their latest research in a poster session. Additionally, three poster abstracts will be selected by the scientific committee for a short lecture. A roundtable discussion will close the scientific part, followed by the award ceremony and the traditional apero.

One of the primary goals of the SPhSD is to promote professional and social contacts between students, postdocs and established scientists in industry, academia, hospitals, public health administration, and public pharmacies. For students and young scientists the SPhSD offers a unique platform for learning about opportunities and career paths in various professional fields. Established scientists can meet young scientists who may be recruited for a position in their organisation.

We look forward to seeing you all in Bern!
